DETAILED ACTION

Election/Restrictions

This application is in condition for allowance except for the presence of claims 19-39, drawn to an invention non-elected with traverse. Jack Friedman gave permission to cancel said claims in a telephone interview on Jan. 30, 2004.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or disclose or make obvious an electrical structure, comprising inter alia: a second conductive body mechanically and electrically coupled to the first conductive body by surface adhesion at the second portion of the surface of the first conductive body, wherein a melting point of the second conductive body is less than a melting point of the first conductive body. Somaki et al. (5,641,113) in view of Akamatsu et al. (5,611,481) disclose said structure, except Somaki would not be compelled to use the solder bumps with different melting points of Akamatsu. Akamatsu uses solder bumps with different melting points to avoid molten solder repellency on an aluminum electrode pad (col.3 line 33 – col.4 line 27). Somaki is silent as to the material content of electrode pads 12 and 22. However, Somaki discloses under Background of the Invention that the electrode pads comprise copper (which is wettable to molten solder), which implies that Somaki's invention also comprises copper electrode pads (col.1 line 64 – col.2 line 1). Therefore, Somaki would not experience

the problem of molten solder being repelled by an aluminum electrode pad and would not look to Akamatsu.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
